

Vuong Tran

Front-End Developer | hello@vuongtran.co | <https://vuongtran.co> | <https://www.linkedin.com/in/vuongtran90>

A front-end developer, currently living in Bangkok, with over 8 years of experience in crafting engaging and user-friendly web experiences.

Experience

AnyMind Group

Front-End Developer | Dec 2017 – Now

Played a crucial part as a core member and front-end team lead in the company's projects, including E-Commerce Management Platform (AnyX), Influencer Merch Marketplace (Popbox), Cloud Manufacturing Platform (AnyFactory), Digital Marketing Platform (AnyDigital).

- Built front-end structure with React, Next.js, Angular.
- Implemented monorepo with atomic design.
- Integrated Sentry for performance and error tracking.
- Used Storybook for UI component development and testing.
- Used GraphQL for better data communication.
- Managed deployments with Google Cloud and Firebase.
- Improved projects quality by actively refactoring
- Shared UX/UI insights with project manager and designer.
- Actively worked on UX/UI improvement for the project.
- Assisted in developer hiring and testing processes.

EXE Corp

Front-End Developer | Aug 2016 – Nov 2017

At EXE Corp, I was assigned to a challenging project for an Australian International School. I had the opportunity to build the entire front-end infrastructure from the ground up using Angular and TypeScript.

- Developed parent system for Australian Intl. School.
- Built front-end structure with Angular, TypeScript.
- Actively worked on UX improvement for the project.
- Worked closely with project owner to meet client needs.

Distance Corp

Front-End Developer | Mar 2015 – May 2016

At Distance, I enhanced my HTML and CSS skills by prioritizing pixel-perfect design, W3C standards, and cross-browser compatibility which strengthened my fundamental skills in HTML and CSS.

- Converted designs to web assets using design tools.
- Proficient in HTML, HTML5, CSS, SCSS, jQuery, and Bootstrap.
- Ensured website performance across browsers.
- Committed to W3C code standards and pixel-perfect design.
- Self-learned Ruby on Rails and Javascript to expand skills.
